Skills

- AI & GenAI
- LLM & Ollama
- Prompt Engineering
- LangChain
- OpenAI API
- RAG & Vector DB
- Python
- FastAPI
- React.js & Framework
- Git & GitHub
- CI/CD
- RDBMS
- Leadership
- Problem Solving

SUMMARY

To leverage over one years of experience as a AI Engineer, contributing my expertise, intelligence, and skills to a dynamic and expanding organization. Eager to acquire new technical competencies, I seek opportunities for professional growth within the company.

Project

SQL Analytics Chat-Bot Platform

I built an AI-powered chatbot that converts natural language queries into SQL, fetches results from a database, and returns answers as text, Excel downloads, or interactive maps. It includes user authentication and smart error handling. I also created a sample UI using Streamlit and deployed everything on an Azure VM. **Tech Stack:** FastAPI, LangChain, OpenAI, Pandas, Folium, MS SQL Server, Streamlit, Azure VM, SSH, Linux CLI, React.js & Tailwind CSS

AI WhatsApp Chatbot with Automation

I created a web chatbot using React.js that works with an AI backend to answer customer questions. It supports both text and voice chat, and logs all interactions to a CRM. I used vector databases to improve accuracy with RAG (Retrieval-Augmented Generation). **Tech Stack:** React.js, FastAPI, OpenAI, LangChain, Pinecone, FAISS, Chroma, Qdrant, RAG

Sales Customer Support AI Chatbot – Web

I developed a WhatsApp-based customer support chatbot using Meta's Business API. It supports text and voice, multilingual responses, and voice translation. I integrated CRM logging and built FastAPI APIs for handling chat logic and tracking usage. **Tech Stack:** FastAPI, Meta WhatsApp API, OpenAI, Google Translate API, 11 Labs, LangChain, Pinecone, RAG

Experience

- AI Engineer** June 2024 - Present
ZGROW Solutions Private Limited • Chennai Full-time
I build AI-powered full-stack solutions with a focus on RAG pipelines, LLMs, and real-time cloud deployments. My role spans backend, frontend, database management, and AI integration across platforms like web and WhatsApp.
- AI Internship** Feb 2024 - Feb 2024
Vincilium • Chennai Full-time
Built an interactive PDF query chatbot using sentence transformers and FAISS. Implemented semantic search to reduce manual information retrieval. Explored open-source LLMs like LLaMA 3.

Education

- Vel Tech Multi Tech Engineering College** 2020 - 2024
B.E. in Computer Science & Engineering
- Vijayanta Model Hr Sec School** 2019 - 2020
Higher Secondary (HSC)
- Vijayanta Model Hr Sec School** 2017 - 2018
Higher Secondary (HSC)
